and elsewhere, have experienced much he the district.

The land grant court commences for lies every possible courtesy to make their stay in the old pueblo pleasant. It is said that the court comprises an unusual amount of legal ability, which has commanded great respect wherever the sessions have been held. United ceiving a most hearty welcome. The land grant settlers have a staunch and safe friend in United Charley Mitchell's Welcome Not States Attorney Reynolds, a man who makes their interests his own, and protects their homes with a marked ability that shows careful study. He is today United States by Inspector Warnise, the best informed man of the law ap-chief of the quarantine guard, on the pertaining to land grants in the United ground that the immigration laws ex-States.

Samel Hughes takes rank as a weather profit second to none. With a clear sky and warm spring weather, he prophesied snow for Tuesday, the 14th, and the snow came, and capped the surrounding mountains and fell in the streets of Tueson, though it failed to lay and whiten the ground. We have known for a considerable period that known for a considerable period that come to stay permanently and not to Sam possessed a shrewd knowledge of visit. Candidates for office are looming up on all sides. As a rule they are men in good standing, capable of filling the offices they seek creditably, making good public servants.

Statehood is not so near as to be dangerous, I regret to say. Monkeying with our rights is mere partime to congress, and it would be cruel not to resolve ourselves into a football for their amusement. What the Democrats will do for statehood we will be allowed to reflect over for a long time, as there is no probability of more than a special session of the senate to confirm the appointees of the incoming president.

Things are getting hot among the Democratic factions here. It is war to of the interior under the new administhe knife, and razors in the air. Hughes is a candidate for governor, and serious and constant menace to the setthe fight is going to be bitter, but in there from the Navajoes and is as folthe natural course of events the result lows: must be determined early in the fight,

Mining matters are looking particularly bright at present. New discoveries in our county show the immense riches hidden from sight, which energetic development may discover. The land grant curse is a blight on mining in southern Pima, and when these matters are settled an increased activity may be expected.

A strict game law ought to be passed by the present legislature. Thousands of dozens of quail are being trapped openly in Arizona and sent to market in large cities. The time is not far distant when the eastern huntsman can not come to Arizona for game, it is a fact that unless active measures are taken to protect our game, it will soon buffalo of the plains, that were driven to slaughter by the thousand merely for their pelts. The trapping of quail is an outrage, and the heavy hand of the law ought to be laid on persons guilty of such acts.

I hope the game laws may be made sufficiently strict to preserve a reasonable amount of game within our the text the document. Pima county expects great thing of its legislators.

HOW TO DO IT.

Arizona Will Send Modern Material to Congress.

An Old Washington Man Offers the Following Suggestion to Coming Congressmen of Arizona.

As Arizona will some day in the saccharine subsequently, or in other words in the sweet bye-and-bye doubtreceive a blessing from both branches of congress, which, together with the benediction of the president, will entitle her to all the privileges and emoluments of a membership card in the sisterhood of states, it may not be amiss at this particular time to offer a little advice to some of the members of the present territorial legislature, as well as to outsiders who, per chance may have a congressional "bug" concealed under their hats.

That there is good material to be found in this legislature from which to manufacture congressmen no one dare gainsay. It is a well known fact that any state legislature is a grand primary department for persons with higher aspirations, but oh! what a dif-ference when you reach Washington. The modus operandi will to all appear ances be very familiar, indeed, and you may think you know it all by heart; but you don't. When for the first time you catch the speaker's eye and hear his voice thunder "The gentleman from Arizona," icicles are very apt to slow; refuse to be interrupted by any senate to carry with them. Should their been here, sir, for about six months trying to catch your eye, you lop-eared. lantern-jawed, squinteyed son-of-a'gun, but until now have been unable to do so. Perhaps sir, you don't know where I hail from. I'll have you know sir,

that I come from Arizona. You may hang Salt river on a clothes line to dry; lasso an avalanche

over the mouth of a volcano to stop the flow of lava, scrape all the snow from the Huachucas with a spoon, paste 'To Let' on the moon and stars, but

never for a momen, allow yourself to be deluded with the idea that the grand and glorious state of Arizona is going to waste for the want of national aid."
Then ask leave to have the balance of your remarks printed in the Record and score one for Arizona.
